CYBER SECURITY: YOROI ENTERS INTO AN AGREEMENT WITH GRANT THORNTON FINANCIAL ADVISORY SERVICES

Bologna/Milan, 7 November 2016 – **Yoroi**, a leading Italian cyber security services provider, is glad to announce to have entered into a commercial partnership agreement with **Grant Thornton Financial Advisory Services**, a company operating in the advisory services industry.

Further to this agreement, Grant Thornton Financial Advisory Services will offer its clients protection from cyber-attacks through Yoroi's advanced Cyber Security Defence Center, managed and constantly monitored and updated by Yoroi's analysts.

“The partnership with Grant Thornton Financial Advisory Services is one-of-a-kind and shows that the cyber security challenge does not concern only corporate IT functions, but is now at the top of the management agenda” commented **Marco Testi, Commercial Director at Yoroi**. *“More and more frequently, companies are subject to cyber-attacks that conventional cyber security solutions, mainly appliance-based, cannot understand, nor limit. This is due to the fact that an ongoing, human intelligence-based analysis is needed in addition to technology and this is where Yoroi services focus.”*

“Our daily experience with clients confirms that prevention and protection from cyber-attacks is a top priority for business leaders”, declared **Stefano Salvadeo, CEO of Grant Thornton Financial Advisory Services**. *“Yoroi's consultancy approach is particularly aligned to ours and we are glad to be in a position to offer our clients a cutting edge solution which combines analysts' professionalism with the best software available. This will allow our firm to broaden the range of high value-added services we provide to our clients to prevent and manage corporate risks”*.

Information on Yoroï

“Defence belongs to Humans”. This is the credo underpinning Yoroï’s approach to cyber security. Yoroï is an Italian company founded by Marco Ramilli, providing Managed Security Services through an innovative approach, which combines technological intelligence and human intelligence. Yoroï’s Cyber Security Defence Center is a technological platform protecting a company’s clients from cyber-attacks, while a team of expert analysts constantly monitors threats, to promptly initiate countermeasures and to identify new potential unknown attacks. Yoroï has offices in Bologna, Cesena and Milan and was defined by Hakin9.org “one of the most extraordinary companies founded in Europe”. www.yoroï.company
